

### **How To Replace Cartridge Chips:**

\*\*\* Be gentle when handling your new chips. You do not want to handle them any more than you have to. It is recommended that you wear an anti-static wrist band when handling your cartridge chips \*\*\*

1. Remove the current chips with a small flat head screwdriver.
2. Install the new chips on the appropriate cartridges.

K = Black, C = Cyan, LC = Light Cyan, M = Magenta, LM = Light Magenta, and Y = Yellow.

3. If for some reason one of the chips will not stay in place, put a small drop of silicon on the cartridge where chips goes. Be careful not to get any silicon on the front of the chip.
